

# Smile CDA Exchange+: Unlock the Power of Your Clinical Data

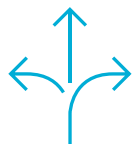

Healthcare organizations face significant challenges in managing clinical data integration, requiring solutions that are efficient, scalable, and compliant with industry standards. Smile CDA Exchange+ addresses these challenges by providing a seamless, robust platform that simplifies the complexities of data transformation and supports better decision-making through enriched, actionable insights.

Smile CDA Exchange+ enables the acquisition, normalization, and enhancement of clinical data from electronic health records (EHRs) and health information exchanges (HIEs).

By delivering an intuitive, integrated approach, it empowers organizations to **overcome interoperability barriers, streamline processes,** and achieve **impactful outcomes.**

Introducing Smile CDA Exchange+ Our premium solution is designed to transform your C-CDA\* data into actionable FHIR resources, ensuring seamless interoperability and compliance with industry standards.

## Why Choose Smile CDA Exchange+?

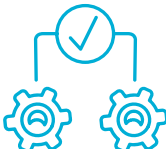

### Enhanced Interoperability

Seamlessly integrates clinical data into a unified, accessible record.

### Scalability

Efficiently manage data at any scale with ease.

### Compliance

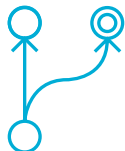

Ensure adherence to regulatory requirements effortlessly.

### Strategic Insights

Gain actionable CDI strategies for better business outcomes.

## Product Highlights

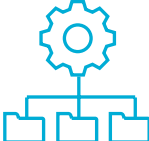

### Bi-Directional Transformation

Effortlessly converts data between C-CDA and FHIR.

### Out-of-the-Box Support

Pre-configured mapping for easy, code-free conversions.

### Plug-and-Play Implementation

Supports US Core 5.0.1 and USCDI v2.

### Integrated Solution

Leverages the Smile Health Data Platform for added data enrichment and elevation.

# Smile CDA Exchange+: Unlock the Power of Your Clinical Data

Smile CDA Exchange+ enhances data sharing and care coordination across Health Information Exchanges (HIEs), streamlines claims processing and accuracy for payers, and consolidates patient records for comprehensive care in Health IT systems. This unified approach supports better decision-making and improved patient care.

## How It Works

1

### Pre-process (optional)

Optimize C-CDA data for smooth transformation.

2

### Transform

Simplify conversions with our robust mapping engine.

3

### Post-process (optional)

Apply business rules to FHIR resources before saving them in the Smile Health Data Platform
