

Better Global Health with Smile Digital Health Solutions

For decades, there have been many proposed data interoperability 'silver bullets' intended to solve the entrenched industry problems of accuracy, scalability and actionable insights. These solutions have not delivered on their promise, leaving healthcare systems burdened with inaccurate, siloed data, lower efficiency and higher costs.

The emergence of the HL7® FHIR® standard will break that pattern. FHIR is a global, open data standard that enables interoperability by helping healthcare organizations model, access, and exchange clinical data using a common language. This has led to FHIR's adoption as a standard for communication by organizations like CMS and ONC.

FHIR is a global, open data standard that helps healthcare organizations model, access, and exchange clinical data using a common language to enable interoperability.

Leveraging the power of FHIR and our industry expertise, the Smile Health Data Fabric (HDF) solution provides enterprise level FHIR data exchange capabilities. The HDF integrates with

systems to ingest, harmonize, enrich, and share clinical data for an actionable single source of truth—the key to a golden record. In addition, Smile can achieve this normalization with the speed and security that healthcare systems expect.

Boasting speed and security, the Smile Health Data Fabric processes a groundbreaking 22,251 resources Per second on standard mid-size company infrastructure.

Smile's highly secure HDF solution is woven and connects with best of breed, innovatively designed, enterprise-ready products and services, with the ability to scale to your needs.

Better Global Health with Smile Digital Health Solutions

Discover more about Smile's innovatively designed, enterprise-ready features products and services below:

FHIR-BASED APIS

The Key to Facilitating EHR data

Smile's ONC-compliant FHIR-based APIs help unlock the electronic health record data, enabling efficient and timely access while generating value for all the stakeholders across the healthcare ecosystem.

Smile's FHIR-based APIs can be leveraged for virtually any API Use Case, including Patient and Provider Access APIs, and all other FHIR-based APIs mandated by CMS.

CLINICAL REASONING CAPABILITIES

Smile's CQL-based Clinical Reasoning (CR) capabilities adds value to standardized data by executing interoperable, human-readable clinical logic, boosting efficiency, accuracy, and maintainability of codified workflows, measures, and recommendations.

Smile's CR capabilities can be leveraged for prior authorization, care gap addressing, quality measure reporting, and applying clinical practice guidelines (CPGs).

PRIOR AUTHORIZATION INTEGRATION SUITE

Soon, Smile's new electronic prior authorization solution will be available, which streamlines the Prior Authorization (PA) process, alleviating burdens and delays and enhancing ease, trust, speed and confidence for Payers, Providers and Patients.

Smile's PA Solution contributes to Smile's answer for Payers to the CMS-0057-P Proposed Rule.

PAYER-TO-PAYER SOLUTION

Secure, Efficient Transfers

The Smile Payer-to-Payer (P2P) Solution allows US Payer's Members to transfer their health data from one Payer to another Payer, alleviating the administrative burden.

Smile's P2P Solution contributes to Smile's answer for Payers to the CMS-0057-P Proposed Rule.

APPSPHERE

Workflow Management for SMART on FHIR applications

The Smile appSphere is an integrated productivity suite used to register, test and manage third-party SMART on FHIR applications. The built in workflow tools and automation help to significantly reduce time, cost and third-party risk while being compliant to regulations.

PAYER MEMBER PORTAL

Revolutionizing Member Experience

The Smile Payer Member Portal (PMP) is a secure and intuitive web application, offering members real-time, omnichannel access to and interaction with their clinical and plan data, their providers, and your organization.

MANAGED SERVICES

Smile Managed Services hosts and fully manages your solutions, so that you can focus on your business, not IT maintenance.

PREMIUM SUPPORT

Smile Premium Support ensures 24/7 operation of your systems, with our FHIR experts' responsive, rapid, and effective complex problem-solving capabilities.

PROFESSIONAL SERVICES

Smile Professional Services leverages our deep FHIR expertise to help your organization scope, implement, train, and everything in between.
