

Value-based care emphasizes patient outcomes over service volume, focusing on quality care delivery while reducing costs. The Smile Health Data Platform enables healthcare organizations to achieve this transformation with advanced data integration, real-time insights, and patient-centered tools, powered by industry-leading technical capabilities.

Transforming Healthcare with Value-Based Care

Improved Patient Outcomes

Delivers measurable health improvements through coordinated, high-quality care.

Optimized Costs

Encourages cost-effective decision-making by aligning incentives with outcomes, reducing waste, and improving efficiency.

Data-Driven Decisions

Real-time insights enable timely, informed interventions, fostering better care and decision-making.

Core Capabilities Driving Value-Based Care

The Smile Health Data Platform combines innovative tools and advanced features to drive success in value-based care delivery.

FHIR Gateway for Interoperability

Serves as a secure, centralized proxy to aggregate and manage multiple FHIR servers. Supports SMART on FHIR and other authentication protocols to enable scalable, standards-compliant interoperability across payers, providers, and patients.

Automated Data Transformation with CDA Exchange+

Converts clinical documents into FHIR-compliant resources, automating ingestion workflows to reduce manual tasks, ensure data consistency, and prepare information for analytics and reporting.

Patient-Centered Access Tools

Enables secure, real-time data sharing with patients through mobile apps and portals, increasing transparency and encouraging adherence to care plans.

Real-Time Data Processing

Offers instant visibility into patient data, allowing care teams to address emerging issues promptly, deliver timely interventions, and coordinate care seamlessly.

Advanced Quality Measure Reporting

Facilitates the tracking and submission of performance metrics with tools for real-time analytics, helping organizations meet value-based reimbursement benchmarks and demonstrate improvements.

Why Smile Health Data Platform?

Built for the future of healthcare, the Smile Health Data Platform offers a robust foundation for value-based care delivery.

Scalable Interoperability

Supports seamless integration of diverse data sources through tools like FHIR Gateway and CDA Exchange+.

Regulatory Support

Built-in compliance with HIPAA, GDPR, and HITRUST® ensures adherence to global standards.

Secure Architecture

Advanced security features like OAuth2, OpenID Connect, and role-based access provide robust data protection.

Real-Time Insights

Delivers instant access to actionable data for better care coordination and decision-making.

The Smile Health Data Platform equips healthcare organizations with the technical tools needed to thrive in value-based care delivery. Enhance your data strategy, empower patients, and improve care workflows with the platform designed for the future of healthcare.
