

Smile dQM: The Most Efficient Way to Identify Gaps in Care

Gaps in care have a widespread impact on all organizations:

Payers

- increased costs and lower reimbursements
- from 2022-23 plans earning a 5-star rating decreased by over 50%, and the average star rating declined by 10%.**

Providers

- higher payouts over time and a decline in star ratings
- losses of over \$63,000 per patient due to unaddressed gaps in care.*

The Smile digital Quality Measures (dQM) solution allows for **automated and continuous measure evaluation** that minimizes the need for manual data entry, turning retrospective care delivery into prospective care management.

Impact with Smile dQM

Payer Impact

Payers have the potential to lower the amount of payouts over time, and increase star ratings and reimbursements.

Hospital Impact

Hospitals have the potential to boost Medicare reimbursements from \$10,000 to \$58,000*** by helping them monitor and address factors that impact patient readmission rates.

Provider Impact

Providers have the potential to realize a Care Gaps ROI of over \$63,000 per patient.*

CARE GAP MANAGEMENT

Identifying patients who might not meet measure scores without proactive intervention.

Approach

Over time, various solutions have been introduced to identify care gaps. However, none have been as efficient, accurate, and quick as Smile's offering.

WANT TO LEARN MORE ABOUT CQL, FHIR®, AND THEIR USES?

Listen to our educational webinar "The Care Gaps Crystal Ball: How You Can Predictably Spot Gaps in Care Before they happen" by Rob Reynolds, VP of Clinical Reasoning at Smile Digital Health

Smile dQM: The Most Efficient Way to Identify Gaps in Care

Leading Innovation: How is the Smile dQM Solution different?

Improvement begins with measurement. The Smile dQM solution provides insights into your population's status, allowing for accurate and efficient identification of care gaps for each patient.

Smile provides the platform that can lead to quantifiable improvements in patient care.

SMILE WILL GET YOU THERE

If FHIR and CQL seem challenging, Smile Digital Health, an award-winning healthcare technology company with recognized products and FHIR and CQL experts, is here to help.

Do More with One Company, One Platform, Multiple Solutions.

Solve for more than one challenge with Smile's customizable platform, including:

Address healthcare workforce burnout

Improving star ratings

Meeting CMS mandates

Improving data quality

90% more efficient quality measurements

Improving population health

Real-time care management & coordination

Learn how our flexible solutions can meet your needs and address your use cases. Book a Meeting Today.
