

Data is essential to better outcomes. It should be accessible whenever and wherever it's needed most. Leaning on our extensive expertise in streamlining data sharing through our FHIR first Health Data Fabric (HDF), Smile Digital Health is your organization's proven interoperability partner.

## Empowering Seamless Connectivity and Optimizing Healthcare Insights

Decades of promised data interoperability solutions in healthcare have failed, leaving inaccurate, siloed data, resulting in challenges HIEs know all too well: partial data sharing, security and privacy concerns and soaring data feed maintenance costs.

The emergence of the HL7® FHIR® standard breaks that pattern. FHIR is a global, open data standard that enables interoperability by helping healthcare organizations model, access, and exchange clinical data using a common language. This has led to FHIR's adoption as a standard for communication by organizations like ONC<sup>1</sup>, specifically with the Trusted Exchange Framework and Common Agreement (TEFCA).

Leveraging the power of FHIR and our industry expertise, the Smile HDF solution integrates with systems to ingest, harmonize, enrich, and share clinical data for an actionable single source of truth—the key to whole-person care.

## Want to Elevate Your Health Information Exchange?

[Click here to learn how FHIR and Smile can help!](#)

**Think Smile Digital Health** when you need the most trusted, secure, scalable and performant Health Data Fabric available.

**Think Smile Digital Health** when you need more than just a FHIR server. Smile includes **clinical reasoning capabilities**, and additional front-facing applications to extend your data fabric to new heights.

Our sought after FHIR and CQL expertise is at your fingertips, from implementation to custom development services, managed services and 24/7 support.

Unlock a multitude of potentials that goes beyond what we initially thought was possible—all with a single solution, the Smile HDF—encompassing:

**Smile Digital Health: Your Trusted Guide**  
Smile is your best choice when it comes to enabling complete data sharing, meeting ongoing compliance, lowering costs and improving patient care.

Let's Discuss Your HIE Challenges and Opportunities.
